Project type	CARDS 2000 Curriculum Development
Target country(ies)	AL, MK
Subject area	T360 - Tourism and Leisure
Title	Enhancing regional co-operation in Southeastern Europe: curriculum updating and adoption for tertiary-level hospitality and tourism courses
Objective	To ensure through a regional co-operation J.E.P. that the beneficiary consortium members' universities are in a position to offer contemporary tourism and hospitality education which is targeted towards the changing needs of the political, economic and social environment of the Balkan region. More specifically, the proposed project is aimed at bringing undergraduate tourism and hospitality curricula, teaching methods and learning provisions at the relevant faculties of the beneficiary consortium members into line with the current needs of the region. The new qualified graduates will match the demand of the local labour market of the tourism and hospitality industry, the development of tourism at the partner countries will be assisted and, due to the regional nature of the project, the cooperation, understanding and mutual assistance among the partner countries will be greatly assisted.

Project type	CARDS 2002 Curriculum Development
Target country(ies)	AL, CS, HR, MK
Subject area	T360 - Tourism and Leisure
Title	Advanced regional cooperation in South-Eastern Europe: development of postgraduate curriculum for hospitality and tourism studies.
Objective	To ensure through a Multi-Partner Country JEP that the beneficiary consortium members' universities are in a position to offer contemporary tourism and hospitality education at postgraduate level (Master) which is targeted towards the changing needs of the political economic and social environment of the Western Balkan region. The proposed project is aimed at developing postgraduate (Master) tourism and hospitality curricula, teaching methods and learning provisions at the relevant faculties of the beneficiary consortium members in line with the current needs of the region as well as in line with the academic standards and practices employed by universities at EU countries. In addition, the postgraduate (Master) tourism and hospitality curricula will: 1) fully adopt the European Credit Transfer Scheme (ECTS) . 2) incorporate a number of modules/courses to be taught by Distance Learning. It is expected that the new qualified graduates will match the demand of the local labour market of the tourism and hospitality industry, the development of tourism at the partner countries will be assisted and, due to the regional nature of the project, the cooperation, understanding and mutual assistance among partner countries will be greatly enhanced.

Title	Tuning Educational Structures in Europe-phase III: Validation, Dissemination and Further Development
Objective	To include new Bologna signatory states in the project "Tuning Educational Structures in Europe-phase III: Validation, Dissemination and Further Development" and thus actively involve HEIs and countries directly in the work done to carry out the Bologna declaration at University level and contribute to the development of one European Higher Education Area.
Outcomes	<p>In order of the three major tasks foreseen for phase III (see above)</p> <ul style="list-style-type: none"> <li>-A Tuning approach validated by stakeholders.</li> <li>-Application and disuof the Tuning methodology and tools to the member institutions from partner countries</li> <li>-Around a total of around 40 additional networks of subject areas in which the Tuning approach (methodology and tools) has been discussed and tested (around 20 networks) and in which the Tuning methodology and tools have been fully implemented (also around 20)- besides the 9 subject areas of Tuning I and II.</li> <li>-Reference points and first and second cycle level descriptors for around 20 additional subject areas which cover broad academic fields. These reference points and cycles will be published in one volume for wider use. In the future it will be required to make regular updates. The publication will be in EN.</li> <li>-A framework for the use of the Tuning approach (methodology and tools) in all kinds of teaching and learning environments. Established links with organisations working in these fields.</li> <li>-Dissemination material for information and implementation (Newsletter, Journal, leaflets etc.).</li> <li>-A well designed website in which it will be easy to find the key documents and the Tuning general and subject-specific level descriptors and reference points for each subject area.</li> <li>-A well established group of experts for information and counselling.</li> <li>-One or more training facilities for administrative and academic staff.</li> <li>-A manual or handbook regarding the training of generic and subject-specific approaches in terms of teaching, learning and assessment formats.</li> <li>-A comprehensive model for internal quality enhancement and assurance at faculty / school and subject area / programme level.</li> <li>-Sets of reference points and cycle descriptors on subject specific level on doctorate/PhD-level (third cycle) (as a necessary supplement to the work done by the informal Joint Quality Initiative group).</li> <li>-An approach for quality enhancement and assurance in trans-national programmes, e.g. joint degree programmes.</li> <li>-An operational framework for using the learning outcomes and competence approach in formal recognition and comparison of (parts of) qualification.</li> <li>-8 new partner institutions from new and potential Bologna signatory states.</li> <li>-9 Very active networks on subject area level in which institutions are represented from Bologna and potential Bologna signatory countries.</li> <li>-An international platform for the exchange of experience and knowledge regarding subject areas and programmes.</li> <li>-A final report containing the main outcomes and papersproduced in the project to be distributed widely.</li> </ul>

Title	Student Mobility in the European Higher Education Area 2010
Objective	<p>Der Erfolg des Bologna-Prozesses und des Europäischen Hochschulraums wird im Jahre 2010 vor allem daran zu messen sein, ob die Mobilität der Studierenden auf allen Ausbildungsebenen in Europa signifikant zunimmt. Nach Vorstellung der Europäischen Kommission soll sich bis 2010 allein die Zahl der ERASMUS -Studierenden verdreifachen. Auch im geplanten TEMPUS Plus-Programm ist eine deutliche Mobilitätssteigerung beabsichtigt. Ob und wie dies allerdings unter den Bedingungen des Bologna-Prozesses tatsächlich erreicht werden kann, ist bei vielen europäischen Hochschulen noch umstritten. Insbesondere die Umstellung der bisherigen (oft längeren) nationalen Studienprogramme auf die in der Regel kürzeren (oft dreijährigen) Bachelor- und (ein- bis zweijährigen) Masterprogramme führt zur Frage, wie dort Auslandsstudienphasen gesichert und die Voraussetzungen für eine deutliche quantitative und qualitative Verbesserung des Auslandsstudiums bis 2010 geschaffen werden können. Ähnliche Fragen stellen sich für die Doktorandenausbildung, die seit der Berlin-Erklärung der Europäischen Bildungsminister ebenfalls ein wichtiger Teil des Bologna-Prozesses ist. Das vom Deutschen Akademischen Austauschdienst (DAAD) koordinierte SOKRATES/TEMPUS-Projekt "Student mobility in the European Higher Education Area 2010" will sich diesem Thema im Rahmen einer Bologna-Konferenz widmen und wird auf der Basis von nationalen Analyseberichten zur Mobilität in Bachelor-, Master- und Doktorandenprogrammen, die von den Projektpartnern erstellt werden, von good practice-Beispielen aus SOKRATES, TEMPUS und nationalen Programmen sowie von Diskussionsergebnissen aus den Workshops der Konferenz Empfehlungen für die künftige Gestaltung von Studienprogrammen erarbeiten. Hauptprojektpartner sind 30 Nationale SOKRATES-Agenturen und TEMPUS-Informationsstellen in den aktuellen und potentiellen Bologna-Ländern. An der Konferenz, die am 17./18. März 2005 in Bonn stattfindet, nehmen rund 220 Hochschullehrer, Bologna-Promotoren, Studierende sowie Vertreter von SOKRATES- und TEMPUS-Stellen sowie Ministerien teil. Somit sind die unmittelbar betroffenen Akteure des Bologna-Prozesses direkt bei der Erarbeitung der Konferenzempfehlungen beteiligt. Durch die Einbindung der Mehrheit der aktuellen und potentiellen Bologna-Länder ist zudem eine breite Aussagekraft der Ergebnisse gesichert. Die Konferenzergebnisse, Empfehlungen, good practice-Beispiele und nationalen Analyseberichte werden in einem Konferenz-Bericht zusammengefasst und über die Projektpartner in den Bologna-Ländern (auch über Internet) verbreitet. Auch die ERASMUS Mundus-Informationsstellen, die Bologna follow-up Group, die Europäische Kommission und das "tuning"-Projekt erhalten den Bericht zur weiteren Verwendung.</p>
Outcomes	<p>Das Bologna-Projekt soll den Hochschulen in den aktuellen und potentiellen Bologna-Ländern Hinweise geben, wie sie künftig Auslandsphasen in Bachelor-Master- und Doktorandenprogramme einbinden können und die Quantität und Qualität der Studierendenmobilität unter den Bedingungen des Bologna-Prozesses in den kommenden Jahren deutlich verbessern können. Wichtige Anhaltspunkte dafür werden die nationalen Analyseberichte zur Mobilität in Bachelor-, Master- und Doktorandenprogrammen, die good practice- Mobilitätsprojekte in SOKRATES-, TEMPUS- und nationalen Programmen und die Workshop-Ergebnisse und Empfehlungen der Konferenz erbringen, die in einem dreisprachigen (DE,EN,FR)Konferenzbericht zusammengefasst werden. Ein wichtiger Schwerpunkt des Berichts zur Bologna-Konferenz wird die Frage der Einführung obligatorischer Auslandsphasen, der Entwicklung von integrierten Curricula sowie von gemeinsamen europäischen Studienprogrammen mit Doppelabschluss oder einem "joint degree" und auf der Verbesserung der akademischen Anerkennung von im Ausland erbrachten Studienleistungen durch die vergleichbare Nutzung von ECTS und des Diploma Supplement sein. Spezifische Ergebnisse und Empfehlungen für die aktuellen und potentiellen Bologna/TEMPUS/CARDS-und TACIS-Länder werden im Konferenzbericht eigens ausgewiesen.</p>

Title	Exchange of best practices in establishing ECTS
Objective	To facilitate the exchange of best practices gained in the framework of a previously realised Tempus project in establishing ECTS
Outcomes	<p>The concept of the higher education at the Macedonian universities has been changed rapidly in the last few years. The European policy is a part of the overall effort of the Universities aiming and providing a national and European wide compatible educational frame. This process has been accelerated after signing the Bologna Declaration in September 2003 by the Macedonian minister of education and science.</p> <p>This project will be one of the most important steps in that direction. It's main objective is to facilitate the exchange of the best practices in establishing the ECTS as a tool for increasing transparency and facilitating academic recognition for study at other high education institutions in the country or abroad. Below is a list of outcomes that we expect to be realised in order to reach the objective of the project:</p> <ul style="list-style-type: none"> <li>-Train management, academic and administrative staff in the practical establishment of ECTS at at least five departments of the Partner Country institutions</li> <li>-Train academic and administrative staff in practical organising the student mobility</li> <li>-Prepare and publish booklets and CDs of the adapted study programmes</li> <li>-Quality assurance on the adapted study programmes in order to ensure quality and compatibility according ECTS regulative.</li> </ul> <p>To fulfill these ideas a cooperation with few EU country universities which have already established ECTS is planned. In this way the course of the new Institutions in the enlarged Europe will be traceable and in due course the Institution will be able to become an active partner of the EU high education strategy.</p>

Title	The Employability and it's links to Bologna Process
Objective	<p>The official Bologna seminar will address the issue of improved employability of graduates according to new degree structures in the context of the Bologna Process:</p> <ul style="list-style-type: none"> <li>- as one of the cornerstones of the Bologna Process</li> <li>- as one of the main aims of the restructuring of higher education in Europe in the framework of the Bologna process</li> </ul> <p>The term 'employability' still seems to be a bit vague and sometimes even controversial. The seminar will therefore first address the meaning of the concept of employability itself.</p> <p>The core of the seminar will be the analyses of the link of employability and the following objectives of the Bologna Process: new degree structures, curriculum development, mobility and recognition tools.</p> <p>These issues will be discussed in depth within three working groups:</p> <p>I. The employability of graduates and acceptance of their qualifications by employers according to the new degree structures:</p> <ul style="list-style-type: none"> <li>- the characteristics (complementarities and differences) of first and second cycle degrees and the employability of graduates</li> <li>- the characteristics (complementarities and differences) of professional and academic degrees and the employability of graduates</li> </ul> <p>II. The impact of employability on curricular development and the involvement of professional associations and employers in designing and/or restructuring of curricula according to the new degree structures.</p> <p>III. The contribution of different recognition tools towards the improved mobility and employability of graduates:</p> <ul style="list-style-type: none"> <li>- qualification frameworks</li> <li>- Europass (Diploma Supplement)</li> <li>- ECTS</li> </ul> <p>Target groups:</p> <ul style="list-style-type: none"> <li>- BFUG members and consultative members, ministries</li> <li>- National rectors' conferences (via EUA)</li> <li>- Student organisations (via ESIB)</li> <li>- Representative of employers' associations and business community</li> </ul>
Outcomes	<p>The main expected outputs of the seminar are:</p> <ul style="list-style-type: none"> <li>- increased awareness of the topic among interested and wider public via dissemination of seminar materials and report through the web site for the Bergen Ministerial Conference; EUA and ESIB as two participating institutions will use their dissemination networks to promote the seminar and its results;</li> <li>- recommendations to the Bergen Ministerial Conference;</li> <li>- increased involvement of business community in the Bologna Process and improved dialogue between academic/student community and business community (Berlin Communiqué: ?Ministers underline the importance of consolidating the progress made, and of improving understanding and acceptance of the new qualifications through reinforcing dialogue within institutions and between institutions and employers.?)</li> <li>- promotion of the Bologna Process and the topic of the seminar in Slovenia and in the new members of the Bologna process in South East European countries as this would be the first official Bologna seminar in this region.</li> </ul>

Title	Implementing Modules and ECTS for Computer Studies
Objective	Implement system of modules and ECTS for computer science
Outcomes	<p>Principle outcomes are survey and analysis, methodology, implementation and dissemination of the process of implementation of system of modules and ECTS. They can be summarized to the following outcomes:</p> <ol style="list-style-type: none"> <li>1) Analysis of implementation modules and ECTS in EU</li> <li>2) Methodology to implement system of modules and ECTS</li> <li>3) Implementation and dissemination</li> </ol> <p>The survey and analysis of implementation will be realized on two levels: macro and micro level concerning the principles of modules and ETCS as system and practice with analysis of structures, learning outcomes and workload.</p> <p>The methodology will give procedure how to realize restructuring process and implement system of modules and ECTS. It will clearly identify transparent and well defined learning outcomes and competences that lead to credit accumulation and transfer. Indicators will be defined to match the development of implementation.</p> <p>Implementation details and dissemination actions concern diversity of traditions, curriculum design and context, coherence of curriculum, teaching and learning methods, methods of assessment and performance, organization of teaching, ability and diligence of the student.</p>

### Project ID: ID\_SCM-C019A04-2004 - CARDS

Project type and round	CARDS SCM 2004 Information and Dissemination, round of February
Target country(ies)	AL, BA, CS, MK
Subject area	T840 - Regional Cooperation
Title	RE-FORMING ARCHITECTURAL EDUCATION IN THE CARDS COUNTRIES
Objective	The project aims to enhance the capacity for strategic planning and institutional development of Schools of Architecture in the region in the perspective of their incorporation into the European Higher Architectural Education Area. The project also aims at bringing them together in order to the reform processes and use the information developed by the schools of architecture in Europe, in the framework of initiatives related to the Bologna process and the creation of a coherent European education of architects. The second objective of the project is to support the spread of sustainable cooperation actions which will enable in the near future the formulation of educational programmes compatible with the European Higher Education Area without losing their tradition, identity and character. The third objective of the project is to help schools of architecture of the region to prepare a national strategy to develop an architectural education system with contents which will support the local labour market without losing the European orientation of the offered studies in Architecture.
Outcomes	<p>The project is addressed to two different target groups: the first consisted by the Heads of Schools, the directors of departments, the academic program coordinators and the international relations coordinators, of the schools of the region. The project outcomes will supply this target group with: 1) the possibility to understand what the state of the art in Architectural education in Europe is, 2) the information about the methods and strategies that schools of Architecture in Europe tend to implement in their reform processes. 3) the data related to the structure of curricula of different Schools of Architecture in EU, the evaluation methods they apply, the exchange policies they follow, and the links they establish with the professional bodies. 4) enhancement of their strategic and managerial potential by providing them with methods and strategies for the development of their schools in accordance with a European orientation and the particular character of their school.</p> <p>The second group consists of teachers of the main subject areas of architectural education: Architectural Design, Urban Design, Construction and Conservation. The project outcomes will help this target group: 1) at bringing the members of this group in touch with the innovative teaching methods developed in Schools of EU in four subject areas. 2) at giving them the possibility to develop their own teaching practices and strategies. 3) at creating a sustainable dialogue between the teachers of the same subject area and at recording the particular ways of teaching in the different schools of the region.</p>

Target country(ies)	MK
Subject area	T948 - Open and distance learning and/or life-long learning activities
Title	Multilingual Internet Step-by-Step Math for All
Objective	To foster a european-style multilingual cooperation among teachers and students in the smaller state universities for developing and using modern technology based learning. To design and implement a pilot multilingual program for learning the basic practical math skills needed by students of all professions via CD or the internet in a multilingual step-by-step AV demonstration and self-testing format.
Outcomes	Colleagues from the smaller state universities in FYR Macedonia work together to create a concrete, unified, multilingual, modern teaching pilot program which will reach our students and increase their ability to compete in a knowledge-based economy. We develop a multilingual step-by-step cd/internet website for self-study and testing of basic life skills in mathematics. We set up mini-laboratories at each of the pilot institutions, where students have free access to this and other academic websites. We hold interactive workshops for teachers and for students so that the materials will reach the right people thus ensuring their use and continued development. We setup contact and maintenance schedules to ensure the sustainability and future development of this pilot and other such programs.
